

Roof Inspections

Roof Inspection:

A roof inspection is a detailed analysis of the roof shingles, sub-roofing, attic, and truss systems.

The information we provide you will help determine the age & condition of the roof. We will also, inform you of any needed repairs that need to be done in the immediate future. We can provide you with a list of licensed roofing contractors available for estimates and repairs.

Intermountain Inspection Services Inc. can provide you with FHA/VA roof certifications. If you need your roof inspected for any reason. Please contact our office for an appointment 801-540-2600.
